Summary

Backend and full-stack software engineer with strong experience designing, building, and maintaining scalable web applications and APIs. Proficient in modern JavaScript and TypeScript ecosystems, with additional hands-on experience using Go and PHP (Laravel) for backend development. Skilled in database design, microservices architecture, and clean, maintainable code practices. Experienced with DevOps workflows including Git-based collaboration, Dockerized applications, and Kubernetes-based deployments. Comfortable working across the stack, from backend systems to client-facing web and mobile interfaces.

Work Experience

Siolla Digital (Siolla for Financial Technology LLC)

Remote
2025-2026

BACKEND & DEVOPS ENGINEER

- Designed and maintained more than 15 microservices using NestJS, Kafka, and PostgreSQL for fintech systems.
- Implemented event-driven communication with Kafka to support asynchronous processing and service decoupling.
- Optimized PostgreSQL schemas, queries, and migrations for high-volume transactional workloads.
- Built and maintained CI/CD pipelines, enabling automated build, test, and deployment workflows.
- Containerized services using Docker and supported scalable, production-ready deployments.

ALAWAEL ALWATANIA — Kuwait, Hawalli

Remote
2023-2024

FULLSTACK WEB DEVELOPER

- Developed and deployed production web applications using modern backend and frontend technologies.
- Maintained systems through regular updates, security hardening, bug fixes, and performance optimization.
- Prepared and managed hosting servers, ensuring high availability and deployment reliability.

Freelancer

Remote
2020-present

FULLSTACK WEB DEVELOPER

- Developing full-stack web applications using NestJS, React, Next.js, Node.js, and PostgreSQL.
- Designing and implementing RESTful APIs with clean architecture and modular design.
- Maintaining and modernizing legacy systems, improving performance, security, and maintainability.
- Delivering scalable, client-specific solutions in remote, deadline-driven environments.

Asyncs.dev

Remote
2020-2023

FRONTEND DEVELOPER

- Built responsive and reusable UI components using React.js.
- Implemented dashboards and control panels with a focus on usability and performance.
- Integrated frontend applications with backend APIs and ensured cross-browser compatibility.

Skills

Backend Development	Node.js (TypeScript), Go, PHP (Laravel), RESTful APIs, Microservices
Database & System Design	PostgreSQL, MongoDB, Redis, Database Design, System Integration

| DevOps & Cloud | Docker, Kubernetes, CI/CD Pipelines, Git, Cloud Infrastructure |
| Frontend & Mobile | React / Next.js, Tailwind CSS, Mobile-first Design, API Consumption |

Education

Taiz University Taiz , Yemen   2023
BACHELOR'S IN INFORMATION TECHNOLOGY
